ABOUT ME

Hi! I'm pleased to have you here👋🌟. My name is Ayush Shinde , And I'm a UI/UX designer And Graphics designer , background in BE Computer Engineering .

My Story

I have always had a passion for design, which led me to pursue a **diploma in graphic design UI UX Design** . Throughout my studies, I became more interested in the user Interface aspect of design and decided to delve into the world of UI/UX. As am also **BE Computer Engineer** , I learned that design is all about serving the needs of users and creating functional, aesthetically pleasing spaces. These skills are easily transferrable to the UI/UX field, and I found that my background in Computer Engineering helped me to understand the importance of creating intuitive and user-friendly designs.

Personal Skills

Time Management

Managing Deadline And Multiple project efficiently .

Communication Skills

Understanding Client needs and presenting ideas clearly .

Willingness to Learn

Constantly improving and exploring new design techniques

Patience & Perseverance

Reworking Designs .

Collaboration

Working will with clients , marketers and other creatives .

Empathy

Designing with the audience's perspective in mind

ONLINE SHOES APPLICATION

shoe application, it typically includes various screens and features to enhance the user experience. The design may begin with a home screen showcasing featured products, categories, or promotions, providing users with easy access to popular shoe types, brands, or seasonal collections. A product detail screen would offer in-depth information about each pair of shoes, including high-quality images, price, available sizes, and colors, as well as options to add the product to the shopping cart.

HOME CONTROLLER APPLICATION

The HomeController app is designed to provide users with a simple and intuitive interface for managing smart home devices like lights, thermostats, and security systems. The app offers key features such as device control, automation, notifications, user profiles, and energy monitoring. The UI focuses on a clean and minimalist design, with a central dashboard that allows easy access to device settings, automation rules, and preset "scenes" like movie or away modes. Technologies used include React Native or Flutter for mobile development, and integration with smart home APIs like Alexa and Google Home.

PUMA WEBSITE REDESIGN

The redesigned Puma website focuses on providing a modern, seamless, and engaging shopping experience. With a clean, user-friendly interface, the website highlights Puma's diverse product range, including footwear, apparel, and accessories. Enhanced navigation ensures easy access to featured collections, product categories, and exclusive releases. The site integrates high-quality visuals, intuitive product filters, and streamlined checkout processes to help customers find and purchase products quickly. Additionally, the redesign emphasizes brand identity through dynamic visuals, bold typography, and a sleek design that reflects Puma's commitment to innovation and performance.
